# NOVUM
AUTOMATION

Innovate 10x faster.

We help engineering teams make informed decisions faster by building, developing, and installing automated systems that efficiently transform operations to **Industry 4.0**.

THE OLD WAY

PROMEA: STEP INTO 4.0

Lean on Novum.

The things you won't need:

- ✖ Data Engineers
- ✖ IT Analysts
- ✖ Software Developers
- ✖ PLC Programmers
- ✖ Electricians
- ✖ Paper
- ✖ Revision control
- ✖ Avoidable errors
- ✖ Meetings that could've been emails

PROMEA: OUR TRANSFORMATIONAL SYSTEM

01 COLLECT DATA

Instead of manual indicators that require paper notes and produce anecdotal data, we utilize automated sensor modules to capture data with more accuracy, more consistency, and more accessibility.

03 ANALYZE & VISUALIZE DATA

With custom, automated reports, teams can observe trends of real data in real-time, revealing lifecycle insights that typically don't surface in manual analyses or paper report snapshots.

02 STORE DATA

By automatically storing masses of time-series data on a connected cloud database, production data is instantly accessible from anywhere. No more spreadsheet versions, no data silos, and no thumb drives.

04 DECIDE

With insights that are current, accurate, and clear, teams spend less time working through subjective opinions and more time planning updates to the next iteration, ultimately scaling production faster.
